PROFESSIONAL SUMMARY

Detail-oriented and motivated professional with experience in web development, data analysis, and information security. Skilled in building scalable applications and implementing risk and compliance frameworks. Seeking a role in Governance, Risk, and Compliance (GRC) tool development, leveraging hands-on experience with CISO Assistant for risk assessment and compliance automation.

SKILLS

- Programming & Data: Python, NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV
- Automation & Testing: Playwright, Pytest
- Web & Backend: HTML, CSS, JavaScript, React.js, Node.js, Django, REST APIs
- UI/UX & Design: Figma, Wireframing, Prototyping
- Databases: MySQL, MongoDB, SQL
- GRC & Security: CISO Assistant, GRC Tools, Risk Analysis, Compliance Mapping
- Tools: Git, Docker, Data Structures & Algorithms

CERTIFICATIONS

- [Finalist Smart India Hackathon 2022](#)
- [Process Mining Virtual Internship - AICTE](#)
- [Microsoft Azure AI Fundamentals](#)
- [Salesforce Developer Virtual Internship - SmartBridge & SmartInternz](#)

PROFESSIONAL EXPERIENCE

5Data Inc.

Oct 2025 - Current

Software Engineer

Worked on CISO Assistant (GRC Tool)

- Developed and enhanced core features for CISO Assistant, a Governance, Risk, and Compliance (GRC) platform.
- Implemented task import functionality, enabling structured onboarding of compliance and risk tasks.
- Built AWS integration to support cloud asset visibility and risk mapping.
- Designed and implemented user import and synchronization, ensuring users were automatically mapped and synced with assigned tasks.
- Collaborated with security and compliance stakeholders to align features with risk assessment and compliance automation workflows.

iQ Tree Tech Soft.

Oct 2023 - Apr 2024

Software Developer Intern

- Developed and implemented a ChatBot using Django, integrated with the company website.
- Designed and developed an HRMS (Human Resource Management System) using Django to streamline internal operations.

PROJECTS

Offline Fake Job Post Prediction Using Bi-directional LSTM

- Cleaned and structured raw job posting data using Pandas and NumPy.
- Performed exploratory data analysis and pattern identification using Seaborn and Matplotlib.
- Built and trained classification models using Scikit-learn and TensorFlow to detect fraudulent job postings.
- Achieved 97% accuracy.

Smart Farming: Soil-Based Crop Prediction

- Analyzed soil and environmental datasets using Pandas and NumPy.
- Created visual insights for soil conditions and trends using Seaborn and Matplotlib.
- Developed crop recommendation models using Scikit-learn and TensorFlow based on soil nutrients and climate parameters.
- Achieved 95% accuracy.

EDUCATION

Master's Coursework in Information Science (2024 - 2025)

Coursework focused on: Data Visualization, Computational Methods, Information Security, Metadata & Knowledge Organization

University of North Texas

Bachelor of Technology (2020 - 2024)

Majors: Computer Science

Vasireddy Venkatadri Institute of Technology
